

GP Race Series

Custom Grand Prix Racing Sails by Ullman Sails

Our premier racing product is designed specifically to the highest standards for Grand Prix competition. Ullman GP Race sails are built to be lightweight and strong, giving you superior performance and speed on the racecourse.

Cloth Selection

Ullman GP Race paneled sails are built using a Carbon laminate, the premier racing cloth on the market. Carbon laminate is built with large, wide Carbon yarns that flex repeatedly without breaking. Carbon has the lowest stretch of any fiber used in sailmaking today, resulting in strong, lightweight sails that hold their designed shape throughout the wind range. Ullman GP Race sails are also built using a tri-radial panel layout, adding more strength and performance to the life of your sail.

Recent Grand Prix Projects

- Custom Boats
- West Coast Sleds
- TP52s
- Super Maxis
- Mills 41s
- Ocean Racing Classes
(including the Mini 6.50 and Beneteau Figaro)

Performance & Trim

Ullman GP Race sails are built to maximise your performance on the racecourse. Every sail is easy to adjust and control as wind strength and sea conditions change, allowing you to keep the boat balanced and sailing fast.

Advanced Design

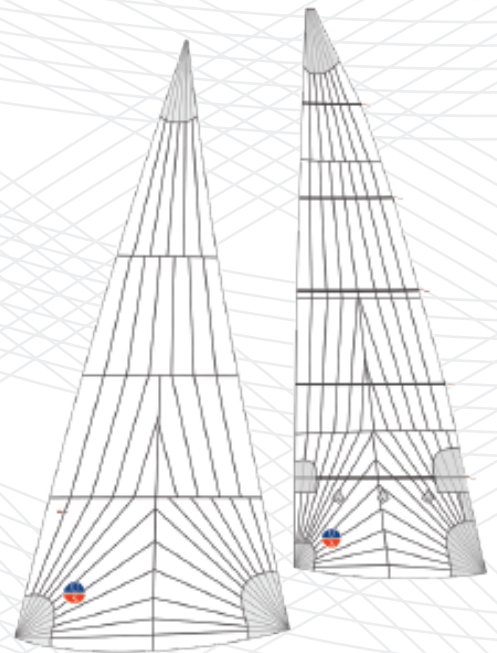

The Ullman Sails Design Team, headed by Ullman Sails President and four-time World Champion Dave Ullman, works on a range of projects from successful Olympic campaigns and competitive One Design classes to Grand Prix racing programs and the America's Cup. Our design program is based on our longstanding success in One Design development. Combining 3-D software, computer analytics and two-boat testing, we optimize sail shape and translate what we learn into larger sail design. The outcome is fast, efficient sail shape that produces top results on racecourses worldwide.

Standard Specifications

- Alloy Headboard
- Upper Full Batten and Standard Lowers
- Tapered Epoxy RBS Battens
- Aramid Leech Lines
- Bolt Rope or Standard Slides
- Stainless Steel Rings in Reefs, Clew & Tack
- Spectra Webbing Reinforcements
- One Reef
- Cunningham
- Draft Stripes, Sail Numbers and Tell Tales

Upgrades

- Carbon Battens
- Titanium Rings

Personalised Service

Ullman Sails works directly with you on your Grand Prix project, consulting on cloth selection, construction and finishings, and inventory options. Every GP Race sail is customised to match your racing style and goals. We offer service for all your racing needs:

- Sail Inventory Management
- Rating Optimisation for Handicap Racing
- Tuning & Trim Advice for Better Results on the Water
- Service & Repair
