

## Race Series

### Custom Racing Sails by Ullman Sails

The Ullman Sails Race Series is designed and built to maximise your speed and performance on the racecourse. Every sail is easy to adjust and control as wind strength and sea conditions change, allowing you to keep the boat balanced and sailing fast.

### Cloth Selection

Race sails are available in performance Dacron as well as a wide selection of racing laminates. The Ullman Sails team works directly with you to determine the best cloth that matches your racing needs, boat specifications and performance expectations.

- High Quality, Woven Dacron (available in multiple weights and finishes)
- Kevlar Laminate
- Pentex Laminate

### Advanced Design

The Ullman Sails Design Team, headed by Ullman Sails President and four-time World Champion Dave Ullman, works on a range of projects from successful Olympic campaigns and competitive One Design classes to Grand Prix racing programs and the America's Cup. Our design program is based on our longstanding success in One Design development. Combining 3-D software, computer analytics and two-boat testing, we optimise sail shape and translate what we learn into larger sail design. The outcome is fast, efficient sail shape that produces top results on racecourses worldwide.

### Personalised Service

Our experienced sailmakers work directly with you from start to finish, making sure you are completely satisfied. We offer consultation and services for all of your racing needs.

- Sail Inventory Management
- Rating Optimisation for Handicap Racing
- Tuning & Trim Advice for Better Results on the Water
- Service & Repairs

## Standard Specifications

All of our racing sails are built to “Grand Prix” standards, regardless of our sail cloth. The same design and construction effort is put into every single sail that wears the Ullman Sails logo.
